

# OGB Pelican HSA 775 CDHP Blue Selections RX Member Guide

20  
18

PLEASE BRING THIS GUIDE WITH YOU TO YOUR NEXT DOCTOR'S VISIT

## Louisiana

# Your Guide to Your Prescription Drug Program

Pharmacy benefits can be complex and understanding your benefits will help you get the most from your health plan. Blue Cross and Blue Shield of Louisiana worked with Express Scripts\*, our pharmacy benefits manager, to create this *OGB Pelican HSA 775 CDHP Blue Selections Rx Member Guide* to help you become familiar with your pharmacy benefits.

During the year, our Blue Cross Pharmacy and Therapeutics Committee — a group of Louisiana doctors and pharmacists — reviews literature about the safety, efficacy and cost of prescription drugs. Based on their advice, we may add drugs – new drugs and drugs already in the market - to our formulary during the year.

You and your doctor will always make the final decision for your healthcare needs. In order to help you both make the best decisions concerning your prescription drugs, you should share this *Guide* with your doctor at your next visit or before you fill your next prescription. That way, together you may choose the best drug for you while keeping your costs down.

Please talk to your doctor or pharmacist about any questions or concerns you may have about your drug therapy.

**Please Note:** Just because a drug is listed on a formulary (drug list) does not always mean your doctor will prescribe it to treat a particular medical or mental illness.

## What do you need to know about the drugs you take?

Before you fill a prescription for any drug, you should ask these important questions:

- Do I need to try one or more drugs before my plan will cover a certain drug for my condition?
- Does my doctor need to get a prior authorization before my plan will pay for my drug?
- Are there limits to how much of the drug will be covered each time I fill a prescription?

You will find the answer to those questions in this *Guide*, as well as a list of the drugs your plan covers.

---

**Note:** **This *Guide* is not intended to include all drugs that your plan covers.** Also, the list may change. This *Guide* may not apply to all benefit plans. Some benefit plans may have different coverage for specific drugs. This *Guide* applies only to prescription drugs that participating pharmacies dispense on an outpatient basis. See your member contract or certificate for pharmacy coverage for any exclusions and limitations that apply to you.

---

## How are prescription drugs classified?

Your plan has 4-tiers of drugs that are covered:

Tier	Description of prescription drugs	
<b>1</b>	Generic drugs	A prescription drug that is a generic drug.
<b>2</b>	Preferred brand drugs	A prescription drug that is a brand-name drug.
<b>3</b>	Non-preferred brand drugs	A prescription drug that is a brand-name drug that may have a therapeutic alternative as a Tier 1 or Tier 2 drug.
<b>4</b>	Specialty drugs	High-cost brand-name or generic drugs that are identified as specialty drugs. These drugs cost the most.

Generally, you will pay the least out of pocket when you buy *generic drugs* — or drugs that are in Tier 1. You will pay the most out of pocket for *non-preferred brand drugs* — those in Tier 3 — and *specialty drugs*—those in Tier 4.

**Important:** If a generic equivalent exists or becomes available, but you continue to use a brand-name drug, you must pay the preferred brand drug copayment, plus the difference in cost between the brand-name drug and its generic equivalent.

### What does it mean when the Tier section shows \$0?

Certain drugs may be eligible for first-dollar (\$0) coverage. That means you do not pay out of pocket for them and you do not pay a deductible. Drugs in these programs are marked with a **\$0** under the tier column. Some rules apply, such as age, gender or frequency.

Broad categories of drugs that may be eligible for this coverage include:

- Some contraceptives (or birth control drugs) for women.
- Selected preventive drugs as recommended by the U.S. Preventive Services Task Force (USPSTF). For example, selected bowel prep products when used with a wellness screening colonoscopy, selected vitamin D products for people identified as having an increased risk for falls and selected generic cholesterol lowering drugs for those who qualify may be covered.

### How can you find information about your drugs?

We list drugs by name along with a page number in the index. Once you find the drug you take, you can learn more about it such as:

- If you must first try one or more prescription drugs before your plan will cover a specific drug for your condition
- If your doctor must get prior authorization before your plan will pay for the drug
- If your plan limits how much of the drug will be covered each time you fill a prescription

Here is what the drug list looks like:

Tier	Drug	Requirements/Limits
<b>1</b>	<i>generic</i>	QPD
<b>3</b>	BRAND	PA; ST
	BRAND NAME drugs are in ALL CAPS. <i>generic drugs</i> are in lower case italics.	PA = Prior authorization QPD = Quantity per dispensing limits ST = Step therapy restrictions

### What Requirements apply to my plan? What do the abbreviations in the Requirements or Limits column mean?

**[PA]: Medications requiring prior authorization**

We must authorize certain drugs before your plan will pay for them. After considering current medical literature, the Pharmacy and Therapeutics Committee sets up the criteria needed for the drugs to be authorized. Then, Express Scripts processes the prior authorization requests.

If you need prior authorization, have your doctor contact Express Scripts:

**Call:** 1-800-842-2015     **Fax:** 1-877-251-5896

For the physician fax form, go to: [www.bcbsla.com](http://www.bcbsla.com) > **Provider** > **Pharmacy**.

**[ST]: Medications requiring participation in the Step Therapy Program**

For drugs in our step therapy program, you must first try certain prescription drugs (Step 1) before your plan will cover other drugs (Step 2) for your condition. If one of the Step 1 drugs is not right for you, your doctor may call us for a prior authorization for a Step 2 drug. You can find more information about drugs that you must try first at [www.bcbsla.com/ogb](http://www.bcbsla.com/ogb). Choose **Pelican HSA 775 Active Employee** and look under **Pharmacy Benefits**.

**[QPD]: Medications that have Quantity Per Dispensing limitations**

Covered prescriptions have a day-supply limit (typically up to a 30-day supply at a retail pharmacy and up to a 90-day supply for mail-order). Your plan also limits how much of certain drugs that can be filled at one time. We call this *Quantity Per Dispensing* (QPD) limitations.

QPD limits are additional to the day-supply limit. They are based on reasons like: what the drug company recommends for how much and how long you should take the drug, if you should take it with each episode or long term, what the FDA recommends or clinical studies, and as determined by Blue Cross. QPD limits or allowances are subject to quantity limits per day supply, per dispensing event or any combination of the two. See your member contract or certificate for the limits for your plan.

For a complete list of drugs and their QPD limits, go to: [www.bcbsla.com/ogb](http://www.bcbsla.com/ogb). Choose **Pelican HSA 775 Active Employee** and look under **Pharmacy Benefits**.

**Specialty Pharmacy Program restrictions on Tier 4 Drugs**

Certain drugs are commonly called *specialty drugs*. Covered specialty drugs are in Tier 4 on this plan. Specialty drugs include biotechnology drugs or other drug products that may require special ordering, handling or customer service. Your policy may limit specialty drugs to the retail day supply listed in your plan (often a 31-day supply).

See your *Schedule of Benefits* for any restrictions that apply to you.

---

For more information and updates, go to: [www.bcbsla.com/ogb](http://www.bcbsla.com/ogb). Choose **Pelican HSA 775 Active Employee** and look under **Pharmacy Benefits** or [www.express-scripts.com](http://www.express-scripts.com).
