

Raise Awareness for Colon Cancer on National Dress in Blue Day – Friday, March 4, 2016

Take the **B.L.U.E** Pledge to kick start good health for yourself and others and fight colon cancer in your community!

- **Be Screened** - Through proper colorectal cancer screening, doctors can find and remove hidden growths (called “polyps”) in the colon before they become cancerous. For adults who are at average risk of colon cancer, it is recommended to begin screening for colon cancer at age 50. Adults who are classified at higher risk, which includes a family history, may begin screening earlier at the recommendation of their doctor.
- **Live a healthy lifestyle** - Eat more fruits, vegetables and whole grains, eat less red and processed meats, increase your physical activity, and limit the amount of alcohol you drink. If you are a smoker, seek help to quit and nonsmokers decrease your exposure to second hand smoke.
- **Understand the facts about colon cancer** - Colon cancer is the third most common cancer in the United States. It is the second leading cause of cancer death, when men and women are combined, yet it can be prevented or detected at an early stage.
- **Engage others** - Talk with loved ones about family history of cancer and other gastrointestinal diseases that may be precursors to colon cancer
