

## 2026 Pelican HSA 775 CDHP Maintenance/Preventive Care Drug List

Preventive care medications are drugs that can help you prevent health problems or problems caused by a health condition. The OGB Pelican HSA 775 CDHP (consumer-driven health plan) Maintenance/Preventive Care Drug List shows certain brand and generic preventive drugs covered by your plan.

Drugs on this list are covered with no deductible when you fill them at a network pharmacy, though they may require you or your doctor to follow some rules based on your plan. Please see your benefit plan for a full list of these rules, which are listed as benefits, limitations and exclusions. This list is not all-inclusive and does not guarantee coverage. This list is revised periodically and is subject to change without notice. Medications may be subject to prior authorization, step therapy requirements, and quantity limits. Brands with a generic equivalent available will be charged a penalty equal to the difference between the generic co-pay and the brand name medication. This penalty will not be applied to either member deductible or OOP (out-of-pocket). An approved prior authorization is required to remove the drug selection penalty.
